**BATSHEVA SEMINARS**

The Batsheva Seminars are the prime activity of the Batsheva de Rothschild Fund. Their purpose is to develop, deepen and advance knowledge in basic research in Israel. They present ideal opportunities for scientists from Israel and abroad to meet, present and exchange knowledge and ideas within a framework of lectures, discussions and workshops, over the course of about a week.

The seminars began in 1963 as the first platform for organized meetings of scientists from Israel and abroad, who are conducting research in various scientific disciplines. Anticipating future trends, over the years they have had a marked impact on the development of new fields of basic science in Israel.
